

Living with Tarkett® FiberFloor®

Your FiberFloor provides realistic life-like designs and our formulation helps to contribute to improved air for you and your family. Proper care and maintenance are essential to ensure the longevity and functionality of the flooring. FiberFloor is a unique construction that provides warmth, comfort and ease of maintenance. For more information on FiberFloor, please visit TarkettNA.com.

AVOID DAMAGE FROM HEAVY OBJECTS

Use proper protection (sliders / plywood panels) when moving heavy objects such as furniture and/or appliances to avoid rips and tears. Furniture rests minimize scratching and indents. The manufacturer's warranty is voided when the proper care is not taken with regard moving and resting heavy objects.

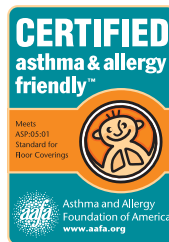

CARE AND MAINTENANCE

- Stains can occur from the dyes and rubber backings used on area rugs or mats. These types of stains are not covered by the warranties.
- Wipe up spills immediately with a damp cloth or mop.
- Periodically wash the floor with Tarkett SureShine or a neutral, "green", floor cleaner designed for sheet vinyl (available at Lowe's or Home Depot) by following the instructions on the packaging. Never use oil-based cleaners, abrasive cleaners, detergents, paste wax, or solvent-based polishes on FiberFloor.
- Avoid high heat, protect from direct sunlight.
- Refrain from wearing narrow heels due to pressure that may cause indentation damage.

BREATHE EASY

Approximately 60 million Americans suffer from asthma and allergies. And, with 93% of our time spent indoors, good indoor air quality is a concern for most of us. FiberFloor's formulation has very low VOC emissions, is Phthalate Free and is certified asthma and allergy friendly by the Asthma & Allergy Association which all contribute to better indoor air quality. So you can rest assured that FiberFloor will not be a trigger for asthma and allergy attacks.

PLEASE take the appropriate care and maintenance of your rental unit which increases the likelihood of your security deposit refund.
